Please kindly provide us the lot number (on the outside of the box) of the kit for more efficient service.

Test principle

This product is used for the rapid detection of Glutinous Rice Adulteration in rice, featuring simple operation and short detection time.

Kits components

Item	Specifications
Detection Solution A	2 vials
Sample Cup	1 pack
Dropper	1 pack
Manual	1 copy

Note: All reagent bottle caps must be tightened to prevent evaporation and microbial pollution.

Other materials required but not supplied

Instruments: Homogenizer, Nitrogen Evaporators, Water bath, Centrifuge, Graduated pipette, Balance (sensitivity 0.01g), Oscillators, EP tubes.

Micropipette: Single channel (20-200 µL, 100-1000 µL)

Notes

1. FOR RESEARCH USE ONLY. Do not use product out of date.
2. The sample cup can be reused after rinsing and air-drying.
3. **Each reagent is optimized for use in the E-IA-C072. Do not substitute reagents from any other manufacturer into the test kit. Do not combine reagents from other E-IA-C072 with different lot numbers.**
4. Dispose of solid and liquid waste generated after using this product in accordance with local regulatory requirements to prevent contamination.
5. This method is applicable to on-site rapid testing. Samples whose test results do not comply with standard limits or labeled values shall be measured in triplicate.
6. The kit is used for rapid screening of actual samples. If the test result is positive, the instrument method such as HPLC, LC/MS, etc. can be used for quantitative confirmation.

Storage and expiry date

Storage: Store at 2-30°C. With cool and dry environment.

Expiry date: expiration date is on the packing box.

Operating Procedures

1. Take 10 test samples, wash the surface with water, drain, and place them in a white porcelain plate.
2. Drop 5 to 10 drops of **Detection Solution A** onto the grain surface and mix evenly.

Judgment of result

1. **Positive:** A brownish-tan color indicates glutinous rice.
2. **Negative:** A blue-purple color indicates ordinary rice.
