Recombinant Human Gastric Lipase/LIPF Protein (Human Cells, His Tag)

Catalog Number: PKSH032480

Note: Centrifuge before opening to ensure complete recovery of vial contents. Description **Species** Human 44.2 kDa Mol Mass Accession AAI12273.1 Not validated for activity **Bio-activity Properties** > 95 % as determined by reducing SDS-PAGE. Purity Endotoxin < 1.0 EU per µg of the protein as determined by the LAL method. Store at $< -20^{\circ}$ C, stable for 6 months. Please minimize freeze-thaw cycles. Storage This product is provided as liquid. It is shipped at frozen temperature with blue ice/gel Shipping packs. Upon receipt, store it immediately at $< -20^{\circ}$ C. Supplied as a 0.2 µm filtered solution of 25mM Tris-HCl, 100mM glycine, 10% Formulation Glycerol, pH 7.3. Reconstitution Not Applicable Data

Background

Castric Triacylglycerol Lipase (LIPF) belongs to the AB hydrolase superfamily. LIPF is an important lipase during the digestion of dietary lipids in cystic fibrosis. LIPF is involved in the digestion of dietary triglycerides in the gastrointestinal tract, and responsible for 30% of fat digestion processes occurring in human. LIPF is secreted by gastric chief cells in the fundic mucosa of the stomach, and it hydrolyzes the ester bonds of triglycerides under acidic pH conditions. LIPF acts distinct roles in neutral lipid metabolism.
