Elabscience®

Elab Fluor[®] Violet 540 Anti-Rat CD45 Antibody[OX-1]

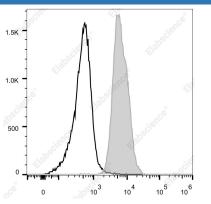

Catalog Number: E-AB-F1227UT3

Note: Centrifuge before opening to ensure complete recovery of vial contents.

| Description | | |
|-------------------------|--|--|
| Reactivity | Rat | |
| Host | Mouse | |
| lsotype | Mouse IgG1, κ | |
| Clone No. | OX-1 | |
| Isotype Control | Elab Fluor [®] Violet 540 Mouse IgG1, κ Isotype Control[MOPC-21] [Product E-AB- F09793T3] | |
| Conjugation | Elab Fluor [®] Violet 540 | |
| Conjugation Information | Elab Fluor [®] Violet 540 is designed to be excited by the violet laser (405 nm) and dete using an optical filter centered near 548 nm (e.g., a 572/28 nm bandpass filter). | |
| Storage Buffer | Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein protectant. | |
| Applications | Recommended usage | |
| FCM | Each lot of this antibody is quality control tested by flow cytometric analysis. Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use. We suggest each investigator should titrate the | |

reagent to obtain optimal results [The recommended concentration is 0.1-1 $\mu g/10^6$ cells in 100 μL volume].

Staining of Rat splenocytes with Elab Fluor[®] Violet 540 Anti-Rat CD45 Antibody[OX-1](filled gray histogram) or Elab Fluor

 $^{\textcircled{R}}$ Violet 540 Mouse IgG1, κ Isotype Control(empty black histogram). Total viable cells were used for analysis.

| Preparation & Storage | | |
|--|--|----------------------|
| Storage | Keep as concentrated solution. | |
| | This product can be stored at 2-8°C for 12 months. Please prote exposure to light and do not freeze. | ected from prolonged |
| Shipping | Ice bag | |
| Antigen Information | | |
| Alternate Names | LCA;Ly-5;T200;Leukocyte common antigen;Ptprc;Receptor-type tyrosine-protein phosphatase C | |
| Uniprot ID | P04157 | |

Gene ID Background

19265

CD45 is a 180-220 kD protein also known as leukocyte common antigen (LCA). It is a protein tyrosine phosphatase with multiple isoforms differing as a result of alternative splicing of the extracellular domain and glycosylation. CD45 is expressed on all hematopoietic cells except erythrocytes and platelets; isoform expression depends on cell type, activation state, and cell maturation. CD45 functions in signal transduction through T and B cell antigen receptors. CD45 has been shown to interact with various proteins including galectin-1, CD2, CD3, and CD4. The OX-1 antibody has been shown to partially inhibit NK cell-mediated lysis of syngeneic tumor cells in vitro.
