Recombinant Human CCL2/MCP-1 Protein

Catalog Number: PKSH032190

Note: Centrifuge before opening to ensure complete recovery of vial contents.

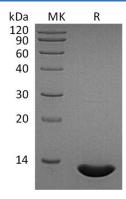

Description	
Species	Human
Mol_Mass	9.5 kDa
Accession	P13500
Bio-activity	Measure by its ability to chemoattract BaF3 cells transfected with human CCR2A.The
	ED ₅₀ for this effect is <20 ng/mL.

Dio-activity	reasure by its definity to encinoactiate But 5 cens transferred with name in Core24. The
	ED ₅₀ for this effect is <20 ng/mL.
Properties	
Purity	> 95 % as determined by reducing SDS-PAGE.
Endotoxin	$< 0.1 \mathrm{EU}$ per $\mu \mathrm{g}$ of the protein as determined by the LAL method.
Storage	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80
	°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of
	reconstituted samples are stable at < -20°C for 3 months.
Shipping	This product is provided as lyophilized powder which is shipped with ice packs.
Formulation	Lyophilized from sterile PBS, pH 7.4.
	Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants
	before lyophilization.
	Please refer to the specific buffer information in the printed manual.

Please refer to the printed manual for detailed information.

Data

Reconstitution

> 95 % as determined by reducing SDS-PAGE.

Background

The chemokine (C-C motif) ligand 2 (CCL2), also known as monocyte chemoattractant protein (MCP)-1 and small inducible cytokine A2 (SCYA2)), is a small cytokine that belongs to the CC chemokine family responsible for monocyte attraction. Its cognate receptor, CCR2, play a critical role in regulating nociceptive processes during neuropathic pain. Both CCL2 and CCR2 are implicated in induction of autoimmunity. CCL2 recruits monocytes, memory T cells, and dendritic cells to the sites of inflammation produced by either tissue injury or infection. Recently research also showed that CCL2 might be useful as a biomarker of fibrosis as well as a target for therapeutic intervention.
