## Recombinant Human LMIR2/CD300C Protein (Fc Tag)

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Catalog Number: PKSH032702

| Description    |  |  |  |
|----------------|--|--|--|
| Species        | Human<br>44.9 kDa<br>Q08708  |  |  |
| Mol_Mass       |  |  |  |
| Accession      |  |  |  |
| Bio-activity   | Not validated for activity   |  |  |
| Properties     |  |  |  |
| Purity         | > 90 % as determined by reducing SDS-PAGE.   |  |  |
| Endotoxin      | < 1.0 EU per µg of the protein as determined by the LAL method.                          |  |  |
| Storage        | Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80 |  |  |
|                | °C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of      |  |  |
|                | reconstituted samples are stable at $< -20^{\circ}$ C for 3 months.                      |  |  |
| Shipping       | This product is provided as lyophilized powder which is shipped with ice packs.          |  |  |
| Formulation    | Lyophilized from a 0.2 µm filtered solution of 20mM PB, 150mM NaCl, pH 7.4.              |  |  |
|                | Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants         |  |  |
|                | before lyophilization.   |  |  |
|                | Please refer to the specific buffer information in the printed manual.                   |  |  |
| Reconstitution | Please refer to the printed manual for detailed information.                             |  |  |

> 90 % as determined by reducing SDS-PAGE.

## Background

CD300C is a single-pass type I membrane protein which belongs to the immunoregulatory signaling (IRS) family. CD300C contains one Ig-like V-type domain and is present on the surface of natural killer cells; granulocytes; most myeloid cells; dendritic cells; and a subpopulation of T and B lymphocytes. The CD300C (CMRF-35A) and CD300A (CMRF-35H) molecules are homologous leukocyte surface proteins. CD300a and CD300C play an important role in the cross-regulation of TNF-alpha and IFN-alpha secretion from pDCs. CD300A and CD300C are indistinguishable on the surface of NK cells. The ligand for CD300C is presently unknown.
