背景介绍

Mouse C-X-C Motif Chemokine 15, also known as Cxcl15, is a secreted Protein which is member of the ELR Motif-containing CXC Chemokines. It expressed at low levels in fetal lung, the expression restricted to the lung, produced by bronchoepithelial cells and is released into the airways. It plays an important role in lung-specific neutrophil trafficking during normal and inflammatory conditions. It also appears chemotactic for neutrophils.
