A Reliable Research Partner in Life Science and Medicine

Recombinant Human LRG1 Protein (His Tag)

Catalog Number: PKSH033295

Note: Centrifuge before opening to ensure complete recovery of vial contents.

\mathbf{r}							
H)	es	C	m	n	т	ſΠ	ï

Species Human

Source HEK293 Cells-derived Human LRG1 protein Val36-Gln347, with an C-terminal His

Calculated MW 35.4 kDa
Observed MW 40-60 kDa
Accession AAH34389.1

Bio-activity Not validated for activity

Properties

Purity > 95 % as determined by reducing SDS-PAGE.

Endotoxin < 1.0 EU per µg of the protein as determined by the LAL method.

Storage Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80

°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of

reconstituted samples are stable at < -20°C for 3 months.

Shipping This product is provided as lyophilized powder which is shipped with ice packs.
 Formulation Lyophilized from a 0.2 μm filtered solution of 20mM Tris-HCl, 20mM NaCl, pH 7.5.
 Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants

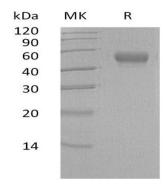

Normany 376 - 876 trenaiose, maininoi and 0.0176 1 ween 80 are added as protectan

before lyophilization.

Please refer to the specific buffer information in the printed manual.

Reconstitution Please refer to the printed manual for detailed information.

Data

> 95 % as determined by reducing SDS-PAGE.

Background

Leucine-rich alpha-2-glycoprotein is a secreted protein and contains 8 LRR (leucine-rich) repeats and 1 LRRCT domain. The leucine-rich repeat (LRR) family of proteins; including LRG1; have been shown to be involved in protein-protein interaction; signal transduction; and cell adhesion and development. LRG1 is expressed during granulocyte differentiation. Levels of the LRG protein are markedly elevated in acute appendicitis and therefore could be used as a diagnostic aid.
