Elabscience®

IBSP Polyclonal Antibody

catalog number: E-AB-52125

Note: Centrifuge before opening to ensure complete recovery of vial contents.

| Description | |
|--------------|--|
| Reactivity | Human;Mouse |
| Immunogen | Synthetic peptide of human IBSP |
| Host | Rabbit |
| Isotype | IgG |
| Purification | Antigen affinity purification |
| Conjugation | Unconjugated |
| Buffer | Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol. |

| Applications | Recommended Dilution |
|--------------|----------------------|
| WB | 1:500-1:2000 |
| Data | |

| Da 95 — 72 — | | |
|--------------------|---|--|
| 55— | | |
| 36— | - | |
| 28— 17— | | |

Western blot analysis of Human fetal liver tissue lysate using

IBSP Polyclonal Antibody at dilution of 1:650

Observed-MW:Refer to figures

| Calculated-MW:35 kDa | |
|---|---|
| Preparation & Storage | |
| Storage | Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles. |
| Shipping The product is shipped with ice pack,upon receipt,store it immediately | |
| | temperature recommended. |

Background

The protein encoded by this gene is a major structural protein of the bone matrix. It constitutes approximately 12% of the noncollagenous proteins in human bone and is synthesized by skeletal-associated cell types, including hypertrophic chondrocytes, osteoblasts, osteocytes, and osteoclasts. The only extraskeletal site of its synthesis is the trophoblast. This protein binds to calcium and hydroxyapatite via its acidic amino acid clusters, and mediates cell attachment through an RGD sequence that recognizes the vitronectin receptor.
