Human MMP-7 Antibody Pair Set

Catalog No. E-KAB-0501 Applications ELISA

Synonyms MMP7;MPSL1;PUMP-1;Matrilysin

Kit components & Storage

| Title | Specifications | Storage |
|--------------------------------|-----------------|------------------------------------|
| Human MMP-7 Capture Antibody | 1 vial, 100 μ g | Store at -20°C for one year. Avoid |
| | | freeze/thaw cycles. |
| Human MMP-7 Detection Antibody | 1 vial, 50 μL | Store at -20°C for one year. Avoid |
| (Biotin) | | freeze/thaw cycles. |

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Product Information

| Items | | Characteristic (E-KAB-0501) | |

Background

Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix in normal physiological processes , such as embryonic development , reproduction , and tissue remodeling , as well as in disease processes , such as arthritis and metastasis. Most MMP's are secreted as inactive proproteins which are activated when cleaved by extracellular proteinases. The enzyme encoded by this gene degrades proteoglycans , fibronectin , elastin and casein and differs from most MMP family members in that it lacks a conserved C-terminal protein domain. The enzyme is involved in wound healing , and studies in mice suggest that it regulates the activity of defensins in intestinal mucosa. The gene is part of a cluster of MMP genes which localize to chromosome 11q22.3.
