

## 200 mM L-Alanyl-L-Glutamine Solution, 100 ×

Cat. No. : PB180419

Size : 100mL

### General Information

Product Form	Liquid
Concentration	100 ×
L-Alanyl-L-Glutamine	200 mM
Recommended working	1 mM-4 mM
Dissolvent	0.85% NaCl
Storage	2-8°C
Shipping	Room Temperature
Expiration date	36 months

### Background

L-alanyl-L-glutamine is an advanced cell culture additive and as a substitute for L-glutamine. L-glutamine is a necessary nutrient element for cells. But it is unstable in solution and can be degraded spontaneously to form ammonia and pyroglutamic acid and ammonia is harmful to cells. L-alanyl-L-glutamine is stable in aqueous solution and does not degrade spontaneously. The mechanism used by the cell is that the cell gradually releases a peptidase into the culture medium during cell culture. The peptidase can hydrolyze L-alanyl-L-glutamine into L-alanine and L-glutamine. L-alanine and L-glutamine can be absorbed and utilized by cells. This not only increases the utilization rate of L-glutamine, but also does not produce excess ammonia, which is more beneficial to cell growth.

### Notes

1. This product is only used for scientific research or further research, not for diagnosis and treatment.
2. This product is sterilized by 0.1 μm filtration.
3. It is necessary to pay attention to the aseptic operation and avoid the contamination.
