Elab Bright™ Violet 650 Anti-Mouse CD3ε Antibody[145-2C11]

Catalog Number: E-AB-F1103U

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity Mouse

Host Armenian Hamster Isotype Armenian Hamster IgG

Clone No. 145-2C11

Elab Bright™ Violet 650 Hamster IgG1, κ Isotype Control[A19-3] [Product AN00818U] Isotype Control

Elab Bright™ Violet 650 Conjugation

Conjugation Information Elab Bright Violet 650 is designed to be excited by the violet laser (405 nm) and detected

using an optical filter centered near 650 nm (e.g., a 660/20 nm bandpass filter).

Storage Buffer Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein

protectant.

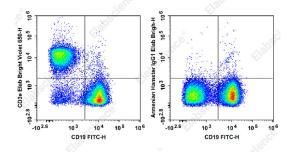

Applications

Recommended usage

FCM

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 µL of antibody per test (million cells in 100 μL staining volume or per 100 μL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Data

Staining of Balb/C murine splenocytes with FITC Anti-Mouse CD19 Antibody[1D3] and Elab Bright Violet 650 Anti-Mouse CD3e Antibody[145-2C11] (left) or Elab Bright Violet 650 Armenian Armenian Hamster IgG1, κ Isotype Control (right). Total viable cells were used for analysis.

Preparation & Storage

Storage Keep as concentrated solution.

This product can be stored at 2-8°C for 12 months. Please protected from prolonged

exposure to light and do not freeze.

Shipping Ice bag

Antigen Information

Alternate Names CD3E;CD3e;T-cell surface antigen T3/Leu-4 epsilon chain;T-cell surface glycoprotein

CD3 epsilon chain;T3E

Background

CD3 ϵ is a 20 kD transmembrane protein, also known as CD3 or T3. It is a member of the Ig superfamily and primarily expressed on T cells, NK-T cells, and at different levels on thymocytes during T cell differentiation. CD3 ϵ forms a TCR complex by associating with the CD3 δ , γ and ζ chains, as well as the TCR α/β or γ/δ chains. CD3 plays a critical role in TCR signal transduction, T cell activation, and antigen recognition by binding the peptide/MHC antigen complex.
