

Recombinant GSTP1 Monoclonal Antibody

catalog number: AN300126P

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

| | |
|--------------|--|
| Reactivity | Human |
| Immunogen | A synthetic peptide corresponding to the N-terminus of the Human GSTP1 |
| Host | Rabbit |
| Isotype | IgG |
| Clone | 5D7 |
| Purification | Protein A |
| Buffer | 0.2 µm filtered solution in PBS |

Applications Recommended Dilution

| | |
|----|--------------|
| WB | 1:500-1:2000 |
|----|--------------|

Preparation & Storage

| | |
|----------|--|
| Storage | This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free. Avoid repeated freeze-thaw cycles. |
| Shipping | Ice bag |

Background

Glutathione S-transferases (GSTs) are a family of enzymes that play an important role in detoxification by catalyzing the conjugation of many hydrophobic and electrophilic compounds with reduced glutathione. Based on their biochemical, immunologic, and structural properties, the soluble GSTs are categorized into 4 main classes: alpha, mu, pi, and theta. This GST family member is a polymorphic gene encoding active, functionally different GSTP1 variant proteins that are thought to function in xenobiotic metabolism and play a role in susceptibility to cancer, and other diseases.
