DUSP7 Polyclonal Antibody

catalog number: E-AB-18976

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description	
Reactivity	Human;Mouse;Rat
Immunogen	Fusion protein of human DUSP7
Host	Rabbit
	IgG
Is otype Purification	с. С
	Antigen affinity purification Unconjugated
Conjugation	
buffer	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.
Applications	Recommended Dilution
IHC	1:50-1:300
Data	
Immunohistochemistry of paraffin-embedded Human tonsil tissue using DUSP7 Polyclonal Antibody at dilution of 1:50(×200)	
Preparation & Storage	
Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	The product is shipped with ice pack, upon receipt, store it immediately at the
	temperature recommended.
Background	
Dual-specificity phosphatases (DUSPs) constitute a large heterogeneous subgroup of the type I cysteine-based protei	
n-tyrosine phosphatase superfamily. DUSPs are characterized by their ability to dephosphorylate both tyrosine and	
serine/threonine residues. DUSP7 belongs to a class of DUSPs, designated MKPs, that dephosphorylate MAPK (
mitogen-activated protein kinase) proteins ERK (see MIM 601795), JNK (see MIM 601158), and p38 (see MIM 600289)	
with specificity distinct from that of individual MKP proteins. MKPs contain a highly conserved C-terminal catalytic	
domain and an N-terminal Cdc25 (see MIM 116947)-like (CH2) domain. MAPK activation cascades mediate various	

physiologic processes, including cellular proliferation, apoptosis, differentiation, and stress responses (summary by Patterson et al., 2009 [PubMed 19228121]).
