Recombinant Human RANTES Protein(Trx Tag)

Catalog Number: PDEH100539

Note: Centrifuge before opening to ensure complete recovery of vial contents.

°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.	Description		
Calculated MW27.4 kDaObserved MW31 kDaAccessionP13501Bio-activityNot validated for activityPropertiesPurity> 90% as determined by reducing SDS-PAGE.Endotoxin< 10 EU/mg of the protein as determined by the LAL method	Species	Human	
Observed MW31 kDaAccessionP13501Bio-activityNot validated for activityPropertiesPurity>90% as determined by reducing SDS-PAGE.Endotoxin<10 EU/mg of the protein as determined by the LAL method	Source	E.coli-derived Human RANTES protein Ser24-Ser91, with an N-terminal Trx	
AccessionP13501Bio-activityNot validated for activityPropertiesPurity> 90% as determined by reducing SDS-PAGE.Endotoxin< 10 EU/mg of the protein as determined by the LAL method	Calculated MW	27.4 kDa	
Bio-activityNot validated for activityPropertiesPurity> 90% as determined by reducing SDS-PAGE.Fndotoxin< 10 EU/mg of the protein as determined by the LAL method	Observed MW	31 kDa	
Properties Purity > 90% as determined by reducing SDS-PAGE. Endotoxin < 10 EU/mg of the protein as determined by the LAL method Storage Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80 °C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months. Shipping This product is provided as lyophilized powder which is shipped with ice packs. Formulation Lyophilized from a 0.2 μm filtered solution in PBS with 5% Trehalose and 5% Mannitol.	Accession	P13501	
Purity> 90% as determined by reducing SDS-PAGE.Endotoxin< 10 EU/mg of the protein as determined by the LAL method	Bio-activity	Not validated for activity

SDS-PAGE analysis of Human RANTES proteins, 2 $\mu g/lane$ of Recombinant Human RANTES proteins was resolved with

SDS-PAGE under reducing conditions, showing bands at

27.4 KD

Background

For Research Use Only

Elabscience®

Chemoattractant for blood monocytes, memory T-helper cells and eosinophils. Causes the release of histamine from basophils and activates eosinophils. May activate several chemokine receptors including CCR1, CCR3, CCR4 and CCR5. One of the major HIV-suppressive factors produced by CD8+ T-cells. Recombinant RANTES protein induces a dose-dependent inhibition of different strains of HIV-1, HIV-2, and simian immunodeficiency virus (SIV). The processed form RANTES(3-68) acts as a natural chemotaxis inhibitor and is a more potent inhibitor of HIV-1-infection. The second processed form RANTES(4-68) exhibits reduced chemotactic and HIV-suppressive activity compared with RANTES(1-6 8) and RANTES(3-68) and is generated by an unidentified enzyme associated with monocytes and neutrophils
