

DSG1 Polyclonal Antibody

catalog number: E-AB-68430

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity	Human; Rat
Immunogen	Recombinant fusion protein of human DSG1
Host	Rabbit
Isotype	IgG
Purification	Affinity purification
Buffer	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.

Applications

Applications	Recommended Dilution
WB	1:500-1:2000
IF	1:50-1:100

Data

Western blot analysis of extracts of various cell lines using DSG1 Polyclonal Antibody at 1:1000 dilution.

Observed-MW: 150 kDa

Calculated-MW: 42 kDa/113 kDa

Immunofluorescence analysis of rat skin using DSG1 Polyclonal Antibody at dilution of 1:100. Blue: DAPI for nuclear staining.

Preparation & Storage

Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	The product is shipped with ice pack, upon receipt, store it immediately at the temperature recommended.

Background

This gene encodes a member of the desmoglein protein subfamily. Desmogleins, along with desmocollins, are cadherin-like transmembrane glycoproteins that are major components of the desmosome. Desmosomes are cell-cell junctions that help resist shearing forces and are found in high concentrations in cells subject to mechanical stress. This gene is found in a cluster with other desmoglein family members on chromosome 18. The encoded protein has been identified as a target of auto-antibodies in the autoimmune skin blistering disease pemphigus foliaceus. Disruption of this gene has also been associated with the skin diseases palmoplantar keratoderma and erythroderma.

For Research Use Only
