Recombinant Human IL-24 protein(His Tag)

Catalog Number: PKSH034109

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description	
Species	Human
Mol_Mass	19.1 kDa
Accession	Q13007
Bio-activity	Measure by its ability to chemoattract BaF3 cells transfected with human IL-20R alpha
	and IL-20R beta. The ED ₅₀ for this effect is <120 pg/mL.

Properties Purity > 95 % as determined by reducing SDS-PAGE. Endotoxin < 0.1 EU per µg of the protein as determined by the LAL method. Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80 Storage °C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months. Shipping This product is provided as lyophilized powder which is shipped with ice packs. Lyophilized from sterile PBS,pH 8.0. Formulation Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants before lyophilization. Please refer to the specific buffer information in the printed manual.

Background

Reconstitution

Multifunctional cytokine mainly produced by T-cells that plays a regulatory role in immune response, tissue homeostasis, host defense, and oncogenesis. Possesses antiviral functions and induces the type I intereferon response during influenza infection. Signals through two receptor complexes IL20RA/IL20RB or IL20RB/IL22RA1. In turn, stimulates the JAK1-STAT3 and MAPK pathways and promotes the secretion of pro-inflammatory mediators including IL8 and MMP1. Intracellularly, maintains endoplasmic reticulum homeostasis by restricting the eIF2alpha-CHOP pathway-mediated stress signal. In addition, acts as a quality control mechanism for the ubiquitin proteasome system by alerting the cell to proteasome dysfunction through activation of PKR/EIF2AK2.

Please refer to the printed manual for detailed information.
