Background

GAPVD1 (GTPase Activating Protein And VPS9 Domains 1) is a Protein Coding gene. Diseases associated with GAPVD1 include Genetic Steroid-Resistant Nephrotic Syndrome. Among its related pathways are RAB GEFs exchange GTP for GDP on RABs and Vesicle-mediated transport. Gene Ontology (GO) annotations related to this gene include GTPase activator activity and GTPase activating protein binding. An important paralog of this gene is RIN2.
