

Recombinant Epcr/PROCR Monoclonal Antibody

catalog number: **AN300267P**

Note: Centrifuge before opening to ensure complete recovery of vial contents.

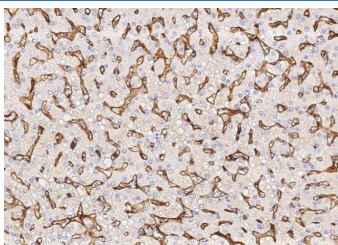

Description

Reactivity	Human
Immunogen	Recombinant Human Epcr / PROCR protein
Host	Rabbit
Isotype	IgG
Clone	B185
Purification	Protein A
Buffer	0.2 µm filtered solution in PBS

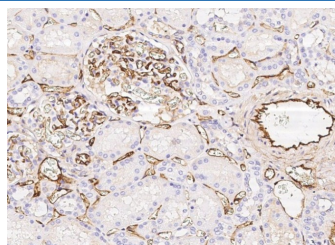

Applications Recommended Dilution

IHC-P	1:100-1:500
--------------	-------------

Data

Immunohistochemistry of paraffin-embedded human liver using Epcr / PROCR Monoclonal Antibody at dilution of 1:200.

Immunohistochemistry of paraffin-embedded human kidney using Epcr / PROCR Monoclonal Antibody at dilution of 1:200.

Preparation & Storage

Storage	This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free. Avoid repeated freeze-thaw cycles.
Shipping	Ice bag

Background

The protein encoded by this gene is a receptor for activated protein C, a serine protease activated by and involved in the blood coagulation pathway. The encoded protein is an N-glycosylated type I membrane protein that enhances the activation of protein C. Mutations in this gene have been associated with venous thromboembolism and myocardial infarction, as well as with late fetal loss during pregnancy. The encoded protein may also play a role in malarial infection and has been associated with cancer.
