

A Reliable Research Partner in Life Science and Medicine

Recombinant ST6GAL1/ST6GAL-I Monoclonal Antibody

catalog number: AN300235P

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity Human

Immunogen Recombinant Human ST6GAL1 / ST6GAL-I protein

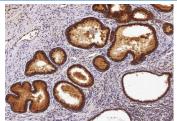

Host Rabbit
Isotype IgG
Clone B153
Purification Protein A

Buffer 0.2 µm filtered solution in PBS

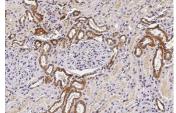

Applications Recommended Dilution

IHC-P 1:100-1:500

Data

Preparation & Storage

Storage

This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free. Avoid repeated freeze-thaw cycles.

Shipping Ice bag

Background

This gene encodes a member of glycosyltransferase family 29. The encoded protein is a type II membrane protein that catalyzes the transfer of sialic acid from CMP-sialic acid to galactose-containing substrates. The protein, which is normally found in the Golgi but can be proteolytically processed to a soluble form, is involved in the generation of the cell-surface carbohydrate determinants and differentiation antigens HB-6, CD75, and CD76. This gene has been incorrectly referred to as CD75. Three transcript variants encoding two different isoforms have been described.
