

## Recombinant Human GAS6 (C-6His)

Catalog Number: PKSH033928

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

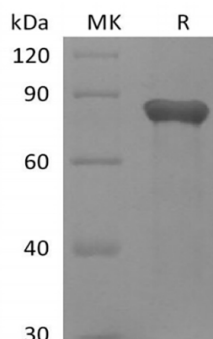

### Description

<b>Species</b>	Human
<b>Source</b>	HEK293 Cells-derived Human GAS6 protein Ala31-Ala678, with an C-terminal His
<b>Calculated MW</b>	72.7 kDa
<b>Observed MW</b>	80-90 kDa
<b>Accession</b>	Q14393-2
<b>Bio-activity</b>	Immobilized Human AXL-His at 10µg/ml (100 µl/well) can bind Human GAS6-His : Biotinylated by NHS-biotin prior to testing. The ED <sub>50</sub> of Recombinant Human GAS6-His is 0.04466 ug/ml.

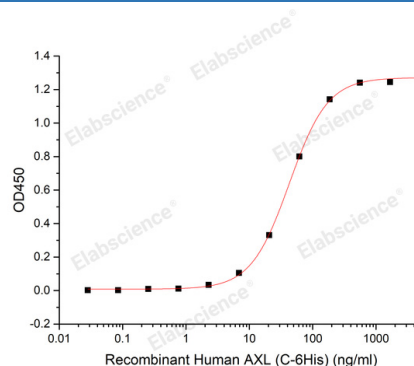

### Properties

<b>Purity</b>	> 95 % as determined by reducing SDS-PAGE.
<b>Concentration</b>	Subject to label value.
<b>Endotoxin</b>	< 1.0 EU per µg of the protein as determined by the LAL method.
<b>Storage</b>	Store at < -20°C, stable for 6 months. Please minimize freeze-thaw cycles.
<b>Shipping</b>	This product is provided as liquid. It is shipped at frozen temperature with blue ice/gel packs. Upon receipt, store it immediately at < - 20°C.
<b>Formulation</b>	Supplied as a 0.2 µm filtered solution of PBS, 10% Glycerol, pH 7.4.

### Data

> 95 % as determined by reducing SDS-PAGE.

Immobilized Human AXL-His at 10µg/ml (100 µl/well) can bind Human GAS6-His : Biotinylated by NHS-biotin prior to testing. The ED<sub>50</sub> of Recombinant Human GAS6-His is 0.04466 ug/ml.

### Background

GAS6 (Growth arrest-specific protein 6) is also known as AXL receptor tyrosine kinase ligand, AXLLG, is a multimodular protein that is up-regulated by a wide variety of cell types in response to growth arrest. Gas6 binds and induces signaling through the receptor tyrosine kinases Axl, Dtk, and Mer whose signaling is implicated in cell growth and survival, cell adhesion and cell migration. GAS6/AXL signaling plays a role in various processes such as endothelial cell survival during acidification by preventing apoptosis, optimal cytokine signaling during human natural killer cell development, hepatic regeneration, gonadotropin-releasing hormone neuron survival and migration, platelet activation, or regulation of thrombotic responses.
