

Recombinant Human S100A6 Protein

Catalog Number: PKSH031346

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Species	Human
Source	E.coli-derived Human S100A6 protein Met 1-Gly 90
Calculated MW	10.2 kDa
Observed MW	10 kDa
Accession	NP_055439.1
Bio-activity	Not validated for activity

Properties

Purity	> 95 % as determined by reducing SDS-PAGE.
Endotoxin	Please contact us for more information.
Storage	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80 °C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
Shipping	This product is provided as lyophilized powder which is shipped with ice packs.
Formulation	Lyophilized from sterile PBS, pH 7.4 Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants before lyophilization. Please refer to the specific buffer information in the printed manual.
Reconstitution	Please refer to the printed manual for detailed information.

Data

> 95 % as determined by reducing SDS-PAGE.

Rev. V3.6

S100 protein is a family of low molecular weight protein found in vertebrates characterized by two EF-hand calcium-binding motifs. There are at least 21 different S100 proteins; and the name is derived from the fact that the protein is 100% soluble in ammonium sulfate at neutral pH. Most S100 proteins are disulfide-linked homodimer; and is normally present in cells derived from the neural crest; chondrocytes; macrophages; dendritic cells; etc. S100 proteins have been implicated in a variety of intracellular and extracellular functions. They are involved in regulation of protein phosphorylation; transcription factors; the dynamics of cytoskeleton constituents; enzyme activities; cell growth and differentiation; and the inflammatory response. S100A6 (S100 calcium binding protein A6) is a member of the S100 family of proteins; and functions in prolactin secretion; and exocytosis. Chromosomal rearrangements and altered expression of S100A6 have been implicated in melanoma.
