

A Reliable Research Partner in Life Science and Medicine

Recombinant Phospho-ATM (Ser1981) Monoclonal Antibody

catalog number: AN301139L

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity Human; Mouse; Rat

Immunogen A synthetic peptide corresponding to residues around (Ser1981) of Human

Phospho-ATM

HostRabbitIsotypeIgG,κCloneB894PurificationProtein A

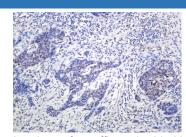

Buffer PBS, 50% glycerol, 0.05% Proclin 300, 0.05% protein protectant.

Applications Recommended Dilution

IHC 1:200-1:1000 **WB** 1:10000-1:50000

Data

Western Blot with Recombinant Phospho-ATM (Ser1981)
Monoclonal Antibody at dilution of 1:1000 dilution. Lane A:
Hela treated with UV for 1 hour lysate.

Immunohistochemistry of paraffin-embedded human breast carcinoma using Recombinant Phospho-ATM (Ser1981)

Monoclonal Antibody at dilution of 1:200.

Observed-MW:351 kDa Calculated-MW:351 kDa

Preparation & Storage

Storage Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.

Shipping Ice bag

Background

The protein encoded by this gene belongs to the PI3/PI4-kinase family. This protein is an important cell cycle checkpoint kinase that phosphorylates; thus, it functions as a regulator of a wide variety of downstream proteins, including tumor suppressor proteins p53 and BRCA1, checkpoint kinase CHK2, checkpoint proteins RAD17 and RAD9, and DNA repair protein NBS1. This protein and the closely related kinase ATR are thought to be master controllers of cell cycle checkpoint signaling pathways that are required for cell response to DNA damage and for genome stability. Mutations in this gene are associated with ataxia telangiectasia, an autosomal recessive disorder.
