

PE Anti-Human Granzyme B Antibody[QA18A28]

Catalog Number: AN00961D

Note: Centrifuge before opening to ensure complete recovery of vial contents.

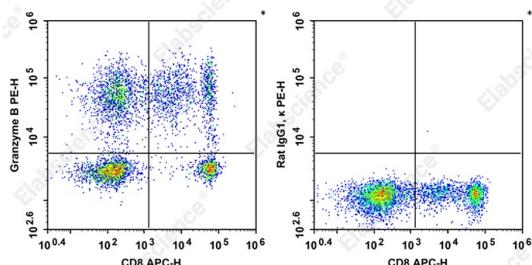

Description

Reactivity	Human
Host	Rat
Isotype	Rat IgG1, κ
Clone No.	QA18A28
Isotype Control	PE Rat IgG1, κ Isotype Control[HRPN] [Product E-AB-F09822D]
Conjugation	PE
Conjugation Information	PE is designed to be excited by the Blue (488 nm), Green (532 nm) and Yellow-Green (561 nm) lasers and detected using an optical filter centered near 575 nm (e.g., a 585/42 nm bandpass filter).
Storage Buffer	Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer.

Applications

Applications	Recommended usage
FCM	Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 μL of antibody per test (million cells in 100 μL staining volume or per 100 μL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for individual use.

Data

Staining of normal human peripheral blood cells with APC Anti-Human CD8a Antibody[OKT-8] and intracellular stained with PE Anti-Human Granzyme B Antibody[QA18A28] (left) or PE Rat IgG1, κ Isotype Control (right). Cells in the monocytes gate were used for analysis.

Preparation & Storage

Storage	Keep as concentrated solution. This product can be stored at 2-8°C for 12 months. Please protect from prolonged exposure to light and do not freeze.
Shipping	Ice bag

Antigen Information

Alternate Names	Granzyme 2;cytotoxic T-lymphocyte-associated serine esterase 1;GZMB;CCP1;Asp-ase Granzyme 2;cytotoxic T-lymphocyte-associated serine esterase 1;GZMB;CCP1;Asp-ase

Uniprot ID	O95155
Gene ID	3002
Background	Granzyme B is a 32 kD serine protease, also known as granzyme-2, serine protease B, CCP1, Asp-ase, and CTLA-1. Granzyme B is abundantly stored in the granules of cytotoxic T lymphocytes and NK cells. Low level of expression has been reported in granulocytes, B cells, and activated dendritic cells. Granzyme B is crucial for rapid induction of cell death and apoptosis through interaction with mannose-6-phosphate receptor.
