

A Reliable Research Partner in Life Science and Medicine

Recombinant Phospho-JNK1, 2, 3 (Thr183, Thr183, Thr221) Monoclonal Antibody

catalog number: AN301149L

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity Human; Mouse; Rat

Immunogen A synthetic peptide corresponding to residues around (Thr183, Thr183, Thr221) of

Human Phospho-JNK1, 2, 3

HostRabbitIsotypeIgG,κCloneB908PurificationProtein A

Buffer PBS, 50% glycerol, 0.05% Proclin 300, 0.05% protein protectant.

Applications Recommended Dilution

WB 1:2000-1:10000

Data

Western Blot with Recombinant Phospho-JNK1, 2, 3 (Thr183, Thr183, Thr221) Monoclonal Antibody at dilution of

1:1000 dilution. Lane A: NIH-3T3.

Observed-MW:46,54 kDa

Calculated-MW:48 kDa

Preparation & Storage

Storage Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.

Shipping Ice bag

Background

The protein encoded by this gene is a member of the MAP kinase family. MAP kinases act as an integration point for multiple biochemical signals, and are involved in a wide variety of cellular processes such as proliferation, differentiation, transcription regulation and development. This kinase is activated by various cell stimuli, and targets specific transcription factors, and thus mediates immediate-early gene expression in response to cell stimuli. The activation of this kinase by tumor-necrosis factor alpha (TNF-alpha) is found to be required for TNF-alpha induced apoptosis. This kinase is also involved in UV radiation induced apoptosis, which is thought to be related to cytochrom c-mediated cell death pathway. Studies of the mouse counterpart of this gene suggested that this kinase play a key role in T cell proliferation, apoptosis and differentiation.
