

A Reliable Research Partner in Life Science and Medicine

# **ZNF207 Polyclonal Antibody**

catalog number: E-AB-92189

Note: Centrifuge before opening to ensure complete recovery of vial contents.

### Description

Reactivity Human; Mouse; Rat

Immunogen Recombinant fusion protein of human ZNF207

Host Rabbit IgG **Is otype** 

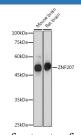

Purification Affinity purification

Buffer Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.

#### **Recommended Dilution Applications**

WB 1:1000-1:2000 IHC 1:50-1:200

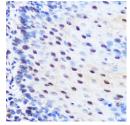

# Data

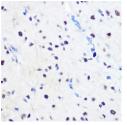

ZNF207 Polyclonal Antibody at 1:1000 dilution.

Observed-MV:51 kDa Calculated-MV:51 kDa

Western blot analysis of extracts of various cell lines using Immunohistochemistry of paraffin-embedded rat brain using ZNF207 Polyclonal Antibody at dilution of 1:100 (40x lens). Perform microwave antigen retrieval with 10 mM Tris/EDTA buffer pH 9.0 before commencing with IHC staining protocol.

Immunohistochemistry of paraffin-embedded human Immunohistochemistry of paraffin-embedded mouse spinal esophageal using ZNF207 Polyclonal Antibody at dilution of cord using ZNF207 Polyclonal Antibody at dilution of 1:100 1:100 (40x lens). Perform microwave antigen retrieval with 10 (40x lens). Perform microwave antigen retrieval with 10 mM mM Tris/EDTA buffer pH 9.0 before commencing with IHC Tris/EDTA buffer pH 9.0 before commencing with IHC staining protocol. staining protocol.

# Preparation & Storage

Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles. Storage

Shipping The product is shipped with ice pack, upon receipt, store it immediately at the

temperature recommended.

Kinetochore- and microtubule-binding protein that plays a key role in spindle assembly. ZNF207/BuGZ is mainly composed of disordered low-complexity regions and undergoes phase transition or coacervation to form temperature-dependent liquid droplets. Coacervation promotes microtubule bundling and concentrates tubulin, promoting microtubule polymerization and assembly of spindle and spindle matrix by concentrating its building blocks. Also acts as a regulator of mitotic chromosome alignment by mediating the stability and kinetochore loading of BUB3. Mechanisms by which BUB3 is protected are unclear: according to a first report, ZNF207/BuGZ may act by blocking ubiquitination and proteasomal degradation of BUB3. According to another report, the stabilization is independent of the proteasome.
