# Recombinant Human SERPINB1/PI2 Protein (Human Cells, His Tag)

### Catalog Number: PKSH032695

Note: Centrifuge before opening to ensure complete recovery of vial contents.

| Description    |  |
|----------------|--|
| Species        | Human  |
| Source         | HEK293 Cells-derived Human SERPINB1;PI2 protein Met 1-Pro379, with an C-terminal         |
|                | His  |
| Calculated MW  | 43.8 kDa   |
| Observed MW    | 40-56 kDa  |
| Accession      | P30740   |
| Bio-activity   | Not validated for activity   |
| Properties     |  |
| Purity         | > 95 % as determined by reducing SDS-PAGE.   |
| Endotoxin      | < 1.0 EU per µg of the protein as determined by the LAL method.                          |
| Storage        | Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80 |
|                | °C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of      |
|                | reconstituted samples are stable at $< -20^{\circ}$ C for 3 months.                      |
| Shipping       | This product is provided as lyophilized powder which is shipped with ice packs.          |
| Formulation    | Lyophilized from a 0.2 µm filtered solution of 20mM PB, 150mM NaCl, pH 7.4.              |
|                | Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants         |
|                | before lyophilization.   |
|                | Please refer to the specific buffer information in the printed manual.                   |
| Reconstitution | Please refer to the printed manual for detailed information.                             |

#### Data

> 95 % as determined by reducing SDS-PAGE.

#### Background

SERPINB1 is a member of the serpin family and Ov-serpin subfamily. As protease inhibitors; serpins have an array of functions including regulating blood coagulation; fibrinolysis; the complement pathway; angiogenesis; inflammation; tumor suppression; extracellular matrix remodeling; and cell motility. SERPINB1 regulates the activity of the neutrophil proteases elastase; cathepsin G; proteinase-3; chymase; chymotrypsin; and kallikrein-3. Reactive bond 1 of SerpinB1 is specific for reaction with chymotrypsin-like protease such as cathepsin G; chymotrypsin or chymase. Reactive bond 2 of SerpinB1 is specific for reaction with elastase-like protease such as neutrophyl elastase; proteinase-3; pancreatic elastase or PSA. In addition; SERPINB1 also functions as a potent intracellular inhibitor of granzyme H.
