

Recombinant Human MFAP4 Protein (His Tag)

Catalog Number:PKSH032754

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Synonyms	Microfibril-associated glycoprotein 4
Species	Human
Expression Host	HEK293 Cells
Sequence	Val22-Ala255
Accession	AAH62415.1
Calculated Molecular Weight	27.5 kDa
Observed molecular weight	37 kDa
Tag	C-His

Properties

Purity	> 85 % as determined by reducing SDS-PAGE.
Endotoxin	< 1.0 EU per μ g of the protein as determined by the LAL method.
Storage	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
Shipping	This product is provided as lyophilized powder which is shipped with ice packs.
Formulation	Lyophilized from a 0.2 μ m filtered solution of 20mM PB, 150mM NaCl, pH7.4. Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization.
Reconstitution	Please refer to the specific buffer information in the printed manual
	Please refer to the printed manual for detailed information.

Data

> 85 % as determined by reducing SDS-PAGE.

Background

Microfibril-associated glycoprotein 4(MFAP4) is a secreted protein and contains 1 fibrinogen C-terminal domain, similarity to a bovine microfibril-associated protein. The protein has binding specificities for both collagen and carbohydrate. It is thought to be an extracellular matrix protein which is involved in calcium-dependent cell adhesion or intercellular interactions. The gene is located within the Smith-Magenis syndrome region.
