

## DYR0100 Cell Complete Medium

Cat. No. : CM-1059

Size : 125mL×4

### General Information

|                      |                                     |
|----------------------|-------------------------------------|
| Product Form         | Liquid                              |
| Concentration        | Ready-to-use                        |
| Components           | Complete culture medium for DYR0100 |
| Bacterial detection  | Negative                            |
| Fungal detection     | Negative                            |
| Mycoplasma detection | Negative                            |
| Endotoxin level      | < 3 EU/mL                           |
| Shipping             | Ice bag                             |
| Storage              | 2-8°C, Shading Light                |
| Expiry date          | 12 months                           |

### Product Introduction

HDYR0100 Cell Complete Medium is carefully designed and optimized by Procell's R&D team. This product already contains various components required for DYR0100 cell growth; no additional components need to be added, and it can be directly used for the in vitro culture of DYR0100 cells. This high-quality complete medium has been strictly verified by DYR0100 cells which could promote cell proliferation and maintain cell properties.

### Guidelines for use

1. Procell's cell culture media undergoes strict quality control to ensure sterility, but may get contaminated during use. Follow these guidelines for sterile handling to avoid contamination.
2. Always wipe your gloved hands and work area with 70% ethanol.
3. Wipe the outside of the containers, flasks, plates, and dishes with 70% ethanol before placing them in the cell culture hood.
4. Use sterile pipette tips and pipettes to work with liquids, and use each pipette tip only once to avoid cross contamination. Do not unwrap sterile pipettes until they are ready to be used. Keep pipettes and tips within the clean work area.
5. Do not talk while performing sterile procedures and perform your cell culture as efficiently and carefully as possible to minimize contamination.

### Quality control

Standard evaluations for cell culture media are pH, osmolality, endotoxins and sterility testing for liquid products, cell growth experiments.

### Notes

1. This product is for research use only.
2. This product is sterilized by 0.1 μm filtration.
3. It is necessary to pay attention to the aseptic operation and avoid the contamination during the culture.
4. It is not suitable for long time storage at room temperature.
5. This product is a ready-to-use medium. If there is no special need, don't add serum, penicillin and streptomycin. It can be used directly.
