

Recombinant Mouse VCAM-1 Protein(His Tag)

Catalog Number: PDMM100192

Note: Centrifuge before opening to ensure complete recovery of vial contents.

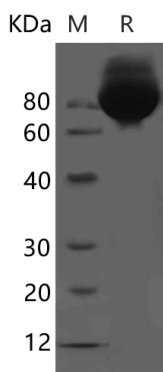

Description

Species	Mouse
Source	Mammalian-derived Mouse VCAM-1 protein Met1-Glu698, with an C-terminal His
Calculated MW	72.0 kDa
Observed MW	117 kDa
Accession	P29533
Bio-activity	Not validated for activity

Properties

Purity	> 90% as determined by reducing SDS-PAGE.
Endotoxin	< 1.0 EU/mg of the protein as determined by the LAL method
Storage	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
Shipping	This product is provided as lyophilized powder which is shipped with ice packs.
Formulation	Lyophilized from a 0.2 µm filtered solution in PBS with 5% Trehalose and 5% Mannitol.
Reconstitution	It is recommended that sterile water be added to the vial to prepare a stock solution of 0.5 mg/mL. Concentration is measured by UV-Vis.

Data

SDS-PAGE analysis of Mouse VCAM-1 proteins, 2 µg/lane of Recombinant Mouse VCAM-1 proteins was resolved with SDS-PAGE under reducing conditions, showing bands at 117 kDa.

Background

Important in cell-cell recognition. Appears to function in leukocyte-endothelial cell adhesion. Interacts with integrin alpha-4/beta-1 (ITGA4/ITGB1) on leukocytes, and mediates both adhesion and signal transduction. The VCAM1/ITGA 4/ITGB1 interaction may play a pathophysiologic role both in immune responses and in leukocyte emigration to sites of inflammation.
