

Anti-Human cytomegalovirus(HCMV) Glycoprotein B/gB Polyclonal Antibody

catalog number: **E-AB-V1264**

Note: *Centrifuge before opening to ensure complete recovery of vial contents.*

Description

Reactivity	cytomegalovirus
Immunogen	Recombinant Human cytomegalovirus (HCMV) Glycoprotein B / gB Protein (His Tag)
Host	Rabbit
Isotype	IgG
Purification	Antigen Affinity
Buffer	0.2 µm filtered solution in PBS.

Applications Recommended Dilution

ELISA	1:5000-1:10000
--------------	----------------

Preparation & Storage

Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	The product is shipped with ice pack, upon receipt, store it immediately at the temperature recommended.

Background

Cytomegalovirus (CMV) (human herpesvirus 5) glycoprotein B, also referred as CMV gB or gB, which belongs to the herpesviridae glycoprotein B family. It is a 97-amino acid glycoprotein encoded by the ORF of UL55. Cytomegalovirus Glycoprotein B protein is the most abundant component of the envelope, a target of neutralizing antibodies with at least two defined neutralizing epitopes and an essential replication component. Cytomegalovirus Glycoprotein B protein plays important roles in HCMV entry, cell-cell spread of internal virions, and fusion of infected cells. In addition, Cytomegalovirus Glycoprotein B protein is one envelope protein capable of heparin binding. It forms a physical association with host cell annexin II independent of the presence of calcium.

For Research Use Only
