## Recombinant Rhesus macaque B7-H4/VTCN1 Protein (His Tag)

### Catalog Number: PKSQ050083

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description	
Species	Rhesus macaque
Source	HEK293 Cells-derived Rhesus macaque B7-H4/VTCN1 protein Phe29-Ala258, with an
	C-terminal His
Calculated MW	26.4 kDa
Observed MW	40-60 kDa
Accession	F7B770
Bio-activity	Loaded Recombinant Rhesus Macaque B7-H4 on HIS1K Biosensor, can bind Human
	B7-H4 mAb with an affinity constant of 0.578 pM as determined in BLI assay.
Properties	
Purity	>95% as determined by reducing SDS-PAGE.
Endotoxin	< 1.0 EU per µg of the protein as determined by the LAL method.
Storage	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80
	°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of
	reconstituted samples are stable at $< -20^{\circ}C$ for 3 months.
Shipping	This product is provided as lyophilized powder which is shipped with ice packs.
Formulation	Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4.
	Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants
	before lyophilization.
	Please refer to the specific buffer information in the printed manual.
Reconstitution	Please refer to the printed manual for detailed information.

#### Data

> 95 % as determined by reducing SDS-PAGE.

#### Background

B7 Homolog 4 (B7-H4) is glycosylated member of the B7 family of immune costimulatory proteins. It is widely expressed, including in kidney, liver, lung, pancreas, placenta, prostate, spleen, testis and thymus. B7-H4 negatively regulates T-cel I-mediated immune response by inhibiting T-cell activation, proliferation, cytokine production and development of cytotoxicity. When expressed on the cell surface of tumor macrophages, plays an important role, together with regulatory T-cells (Treg), in the suppression of tumor-associated antigen-specific T-cell immunity. It also involved in promoting epithelial cell transformation.
