

Recombinant Mouse LSH-A Protein(His Tag)

Catalog Number: PDMM100009

Note: *Centrifuge before opening to ensure complete recovery of vial contents.*

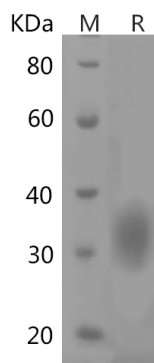

Description

Species	Mouse
Source	Mammalian-derived Mouse LSH-A protein Met1-Ser120, with an C-terminal His
Calculated MW	13.6 kDa
Observed MW	25 kDa
Accession	P01216
Bio-activity	Not validated for activity

Properties

Purity	> 85% as determined by reducing SDS-PAGE.
Endotoxin	< 1.0 EU/mg of the protein as determined by the LAL method
Storage	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
Shipping	This product is provided as lyophilized powder which is shipped with ice packs.
Formulation	Lyophilized from a 0.2 µm filtered solution in PBS with 5% Trehalose and 5% Mannitol.
Reconstitution	It is recommended that sterile water be added to the vial to prepare a stock solution of 0.5 mg/mL. Concentration is measured by UV-Vis.

Data

SDS-PAGE analysis of Mouse LSH-A proteins, 2 µg/lane of Recombinant Mouse LSH-A proteins was resolved with SDS-PAGE under reducing conditions, showing bands at 25 kDa.

Background

Shared alpha chain of the active heterodimeric glycoprotein hormones thyrotropin/thyroid stimulating hormone/TSH, lutropin/uteinizing hormone/LH and follitropin/follicle stimulating hormone/FSH. These hormones bind specific receptors on target cells that in turn activate downstream signaling pathways.
