

# Recombinant Human GABR $\beta$ 3(GABRB3) protein (His Tag)

Catalog Number: PDEH100965

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

## Description

<b>Species</b>	Human
<b>Mol_Mass</b>	24.1 kDa
<b>Accession</b>	P28472
<b>Bio-activity</b>	Not validated for activity

## Properties

<b>Purity</b>	> 95% as determined by reducing SDS-PAGE.
<b>Endotoxin</b>	< 10 EU/mg of the protein as determined by the LAL method
<b>Storage</b>	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80 °C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
<b>Shipping</b>	This product is provided as lyophilized powder which is shipped with ice packs.
<b>Formulation</b>	Lyophilized from a 0.2 $\mu$ m filtered solution in PBS with 5% Trehalose and 5% Mannitol.
<b>Reconstitution</b>	It is recommended that sterile water be added to the vial to prepare a stock solution of 0.5 mg/mL. Concentration is measured by UV-Vis.

## Data

> 95 % as determined by reducing SDS-PAGE.

## Background

$\gamma$ -aminobutyric acid type A receptor  $\beta$ 3 subunit (GABRB3) is a candidate gene for autism spectrum conditions (ASC). Alteration in the gene results in increased tactile sensitivity, or hypersensitivity. Overexpression of GABRB3 might be implicated in the pathogenesis of heroin dependence. Aberration or mutation of this gene leads to neurodevelopmental disorders, such as Angelman syndrome, Prader-Willi syndrome and schizophrenia.[1][3] GABRB3 polymorphisms results in nonsyndromic cleft lip and/or palate (NSCL/P).
