## **Elabscience**®

## c-Fms Polyclonal Antibody

## catalog number: E-AB-15772

Note: Centrifuge before opening to ensure complete recovery of vial contents.

| Storage                  | Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.                          |
| Shipping                 | The product is shipped with ice pack,upon receipt, store it immediately at the           |
|                          | temperature recommended.                                                                 |
| Background               |                                                                                          |
| The protein encoded by   | this gene is the receptor for colony stimulating factor 1, a cytokine which controls the |

The protein encoded by this gene is the receptor for colony stimulating factor 1, a cytokine which controls the production, differentiation, and function of macrophages. This receptor mediates most if not all of the biological effects of this cytokine. Ligand binding activates the receptor kinase through a process of oligomerization and transphosphorylation. The encoded protein is a tyrosine kinase transmembrane receptor and member of the CSF1/PDGF receptor family of tyrosine-protein kinases. Mutations in this gene have been associated with a predisposition to myeloid malignancy. The first intron of this gene contains a transcriptionally inactive ribosomal protein L7 processed pseudogene oriented in the opposite direction.
