## Recombinant Mouse CD83/HB15 Protein (aa 22-134, Fc Tag)

Catalog Number: PKSM041350

Note: Centrifuge before opening to ensure complete recovery of vial contents.

| Description  |   |
|--------------|---|
| Species      | Mouse   |
| Mol_Mass     | 39.5 kDa  |
| Accession    | O88324  |
| Bio-activity | Not validated for activity  |
| Properties   |   |
| Purity       | > 90 % as determined by reducing SDS-PAGE.  |
| Endotoxin    | $< 1.0  \mathrm{EU}$ per $\mu \mathrm{g}$ of the protein as determined by the LAL method. |
| Storage      | Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80  |
|              | °C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of       |
|              | reconstituted samples are stable at < -20°C for 3 months.                                 |
| Shipping     | This product is provided as lyophilized powder which is shipped with ice packs.           |
| Fa           | Lyaphilized from a 0.2 um filtered solution of DDS, pH 7.4                                |

**Formulation** Lyophilized from a 0.2 μm filtered solution of PBS, pH 7.4.

E y opininzed from a 0.2 pm intered solution of 1 Bb, pm 7.1.

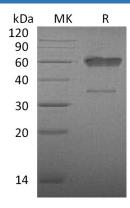

Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants

before lyophilization.

Please refer to the specific buffer information in the printed manual.

**Reconstitution** Please refer to the printed manual for detailed information.

## Data

## Background

CD83 antigen is a single-pass type I membrane protein which contains one Ig-like V-type (immunoglobulin-like) domain. CD83 is expressed by activated lymphocytes, Langerhans cells and interdigitating reticulum cells. It contains one Ig-like V-type (immunoglobulin-like) domain, the soluble CD83 has the opposite effect and has an immune inhibitory capacity. Due to its immune inhibitory function, CD83 may play a significant role in antigen presentation or the cellular interactions that follow lymphocyte activation.
