

A Reliable Research Partner in Life Science and Medicine

# AF/LE Purified Anti-Human CD11b Antibody[ICRF44]

catalog number: E-AB-F11460

Note: Centrifuge before opening to ensure complete recovery of vial contents.

### **Description**

**Reactivity** Human

Immunogen Recombinant Human CD11b protein

**Host** Mouse

**Isotype** Mouse  $IgGl, \kappa$ 

Clone ICRF44

**Purification** >98%, Protein A/G purified

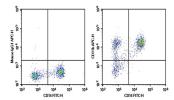

**Conjugation** None (AF/LE)

**Buffer** Sterile PBS, pH 7.2. < 1.0 EU per mg of the antibody as determined by the LAL method

Applications	Recommended Dilution
Applications	ixcommenda Dirudon

FCM  $2 \mu g/mL(1 \times 10^5 - 5 \times 10^5 \text{ cells})$ 

#### Data

Human peripheral blood monocytes were stained with 0.2 μg AF/LE Purified Anti-Human CD11b Antibody[ICRF44] (Right) and 0.2 μg Mouse IgG1, κ Isotype Control (Left), followed by APC-conjugated Goat Anti-Mouse IgG Secondary Antibody, then anti-Human CD14 FITC-conjugated Monoclonal Antibody.

# Preparation & Storage

Storage Storage Store at 4°C valid for 12 months or -20°C valid for long term storage, avoid freeze /

thaw cycles. This preparation contains no preservatives, thus it should be handled

under aseptic conditions.

**Shipping** Ice bag

## Background

Human ITGAM (Integrin alpha M subunit) is a 127kDa (predicted) glycoprotein, a member of the Integrin family of proteins. The Integrin family proteins are heterodimeric transmembrane receptors composed of an alpha and a beta subunit. The Integrin alpha M subunit, also known as MAC-1 alpha subunit or CD11b, combines with the Integrin beta 2 subunit (CD18) to form the non-covalent heterodimer Integrin alpha M/ beta 2, also known as MAC-1 and complement receptor type 3 (CR3).
