

A Reliable Research Partner in Life Science and Medicine

GRIN2A Polyclonal Antibody

catalog number: E-AB-17358

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity Human; Mouse; Rat

Immunogen Synthetic peptide of human GRIN2A

Host Rabbit **Is otype** IgG

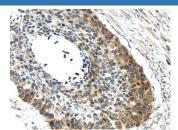

Purification Affinity purification

Buffer Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol.

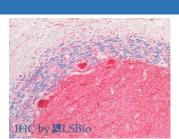

Recommended Dilution Applications

IHC 1:25-100

Data

Immunohistochemistry of paraffin-embedded Human at dilution 1:30

Immunohistochemistry of paraffin-embedded Human esophagus cancer tissue using GRIN2A Polyclonal Antibody Cerebellum using GRIN2A Polyclonal Antibody at dilution of 1:50(Elabscience Product Detected by Lifespan).

Preparation & Storage

Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles. Storage

Shipping The product is shipped with ice pack, upon receipt, store it immediately at the

temperature recommended.

Background

This gene encodes a member of the glutamate-gated ion channel protein family. The encoded protein is an N-methyl-Daspartate (NMDA) receptor subunit. NMDA receptors are both ligand-gated and voltage-dependent, and are involved in long-term potentiation, an activity-dependent increase in the efficiency of synaptic transmission thought to underlie certain kinds of memory and learning. These receptors are permeable to calcium ions, and activation results in a calcium influx into post-synaptic cells, which results in the activation of several signaling cascades. Disruption of this gene is associated with focal epilepsy and speech disorder with or without mental retardation. Alternative splicing results in multiple transcript variants.
