## Recombinant Rat CEACAM-1/CD66a Protein(Fc Tag)

### Catalog Number: PDMR100063

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description	
Species	Rat
Source	Mammalian-derived Rat CEACAM-1/CD66a proteins Gln35-Ala425, with an C-terminal
	Fc
Calculated MW	67.9 kDa
Observed MW	90 kDa
Accession	P16573
Bio-activity	Not validated for activity
Properties	
Purity	> 90% as determined by reducing SDS-PAGE.
Endotoxin	< 1.0 EU/mg of the protein as determined by the LAL method
Storage	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to -80
	°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of
	reconstituted samples are stable at $< -20^{\circ}$ C for 3 months.
Shipping	This product is provided as lyophilized powder which is shipped with ice packs.
Formulation	Lyophilized from a 0.2 $\mu$ m filtered solution in PBS with 5% Trehalose and 5%
	Mannitol.
Reconstitution	It is recommended that sterile water be added to the vial to prepare a stock solution of
	0.5 mg/mL. Concentration is measured by UV-Vis.

#### Data

 $SDS\text{-}PAGE \ analysis of Rat CEACAM\text{-}1/CD66a \ proteins \ , \\ 2\mu g/lane \ of Recombinant Rat CEACAM\text{-}1/CD66a \ proteins \\ was resolved \ with \ SDS\text{-}PAGE \ under \ reducing \ conditions \ , \\ showing \ bands \ at \ 90 \ KD$ 

#### Background

# **Elabscience**®

The carcinoembryonic-antigen-related cell-adhesion molecule (CEACAM) family of proteins has been implicated in various intercellular-adhesion and intracellular-signalling-mediated effects that govern the growth and differentiation of normal and cancerous cells. CEACAM1, also known as biliary glycoprotein I (BGP I) and CD66a, is a member of the carcinoembryonic antigen (CEA) gene family which belongs to the immunoglobulin superfamily. The highly glycosylated CEACAM1 contains one N-terminal V-type Ig-like domain and three C2-type Ig-like domains within its ECD , and one ITIM motif and a calmodulin binding site in the cytoplasmic region. CEACAM1 is a surface glycoprotein expressed on various blood cells , epithelial cells , and vascular cells. It was described as an adhesion molecule mediating cell adhesion via both homophilic and heterophilic manners , and was detected on leukocytes , epithelia , and endothelia. Studies have revealed that CEACAM1 performs actions in multiple cellular processes including tissue differentiation , angiogenesis , apoptosis , metastasis , as well as the modulation of innate and adaptive immune responses.
