

## LDL R Polyclonal Antibody(Capture/Detector)

**catalog number: AN001110P**

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

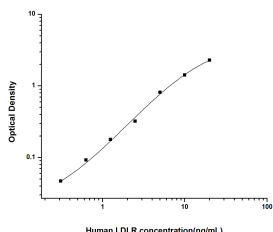

### Description

|                     |  |
|---------------------|--|
| <b>Reactivity</b>   | Human  |
| <b>Immunogen</b>    | Recombinant Human LDL R protein expressed by Mammalian             |
| <b>Host</b>         | Rabbit   |
| <b>Isotype</b>      | Rabbit IgG   |
| <b>Purification</b> | Antigen Affinity Purification                                      |
| <b>Buffer</b>       | Phosphate buffered solution, pH 7.2, containing 0.05% proclin 300. |

### Applications Recommended Dilution

|                       |               |
|-----------------------|---------------|
| <b>ELISA Capture</b>  | 2-8 µg/mL     |
| <b>ELISA Detector</b> | 0.1-0.4 µg/mL |

### Data

Sandwich ELISA-Recombinant Human LDL R protein standard curve. Background subtracted standard curve using LDL R antibody(AN001110P)(Capture), LDL R antibody(AN001110P)(Detector) in sandwich ELISA. The reference range value for Recombinant Human LDL R protein is 0.31-20 ng/mL.

### Preparation & Storage

|                 |  |
|-----------------|--|
| <b>Storage</b>  | Store at 4°C valid for 12 months or -20°C valid for long term storage, avoid freeze / thaw cycles.       |
| <b>Shipping</b> | The product is shipped with ice pack, upon receipt, store it immediately at the temperature recommended. |

### Background

LDLR (low density lipoprotein receptor) is a member of the LDL receptor gene family and is involved in receptor-mediated endocytosis of specific ligands. The LDLR is a cell surface glycoprotein that scavenges LDL from the blood and regulates plasma LDL cholesterol. The cytoplasmic domain of the LDL receptor is necessary for the receptor to cluster in coated pits, which promotes the rapid endocytosis of bound LDL. The protein is highly glycosylated through N- and O-linkages and thus migrates at 100 to 160 kDa bands on SDS-PAGE.
