

Recombinant YY1 Monoclonal Antibody

catalog number: **E-AB-81623**

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

| | |
|---------------------|---|
| Reactivity | Human;Mouse;Rat |
| Immunogen | A synthetic peptide of human YY1 |
| Host | Rabbit |
| Isotype | IgG |
| Clone | R02-8A3 |
| Purification | Affinity Purified |
| Buffer | 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.05% stabilizer and 0.05% protective protein. |

Applications

WB 1:1000-1:2000

Recommended Dilution

Data

Western blot detection of YY1 in K562,Rat

Brain,C6,3T3,HeLa cell lysates using YY1 Rabbit

mAb(1:1000 diluted).Predicted band size:45kDa.Observed
band size:65kDa.

Observed-MW:65 kDa

Calculated-MW:45 kDa

Preparation & Storage

Storage Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.

Shipping The product is shipped with ice pack,upon receipt,store it immediately at the temperature recommended.

Background

YY1,also named as DELTA,INO80S and NF-E1,contains four C2H2-type zinc fingers and belongs to the YY transcription factor family. YY1 is a multifunctional transcription factor that exhibits positive and negative control on a large number of cellular and viral genes by binding to sites overlapping the transcription start site. YY1 may direct histone deacetylases and histone acetyltransferases to a promoter in order to activate or repress the promoter,thus implicating histone modification in the YY1. The open reading frame of the human YY1 cDNA encodes a protein of 414 amino acids with a predicted molecular weight of 44 kDa. However,YY1 migrates on SDS gels as a 65–68 kDa protein,probably due to the structure of the protein. It is a ubiquitously expressed transcription factor with fundamental roles in embryogenesis, differentiation,replication and proliferation.
