

Recombinant CD8 α Monoclonal Antibody

catalog number: **AN301083L**

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity	Human;Mouse;Rat
Immunogen	Recombinant Human CD8 α protein
Host	Rabbit
Isotype	IgG, κ
Clone	B838
Purification	Protein A
Buffer	PBS, 50% glycerol, 0.05% Proclin 300, 0.05% protein protectant.

Applications

Applications	Recommended Dilution
IHC	1:200-1000
WB	1:1000-5000

Data

Western Blot with Recombinant CD8 α Monoclonal Antibody at dilution of 1:1000 dilution. Lane A: Mouse thymus cells.

Observed-MW:35 kDa
Calculated-MW:26 kDa

Immunohistochemistry of paraffin-embedded human colon tissue using Recombinant CD8 α Monoclonal Antibody at dilution of 1:200.

Preparation & Storage

Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	Ice bag

Background

The CD8 antigen is a cell surface glycoprotein found on most cytotoxic T lymphocytes that mediates efficient cell-cell interactions within the immune system. The CD8 antigen acts as a coreceptor with the T-cell receptor on the T lymphocyte to recognize antigens displayed by an antigen presenting cell in the context of class I MHC molecules. The coreceptor functions as either a homodimer composed of two alpha chains or as a heterodimer composed of one alpha and one beta chain. Both alpha and beta chains share significant homology to immunoglobulin variable light chains. This gene encodes the CD8 alpha chain. Multiple transcript variants encoding different isoforms have been found for this gene.
