Recombinant Mouse Carbonic Anhydrase 14/Car14 Protein (His Tag)

Catalog Number: PKSM040970

Note: Centrifuge before opening to ensure complete recovery of vial contents. Description Species Mouse Mol Mass 32.3 kDa Accession O9WVT6 **Bio-activity** Not validated for activity **Properties** > 95 % as determined by reducing SDS-PAGE. Purity Endotoxin < 1.0 EU per µg of the protein as determined by the LAL method. Store at $< -20^{\circ}$ C, stable for 6 months. Please minimize freeze-thaw cycles. Storage Shipping This product is provided as liquid. It is shipped at frozen temperature with blue ice/gel packs. Upon receipt, store it immediately at $< -20^{\circ}$ C. Formulation Supplied as a 0.2 µm filtered solution of 20mM Tris-HCl, 150mM NaCl, pH 8.0. Reconstitution Not Applicable

Background

Mouse Ca14,also known as Carbonic anhydrase 14,is a member of large family of zinc metalloenzymes .It could catalyze reversible hydration of carbon dioxide. The reaction is fundamental to many processes such as respiration, renal tubular acidification and bone resorption. Fifteen CA isoforms have been reported so far. They have different patterns of tissue-specific expression and physiologic roles. Some CAs may serve as markers for tumors and hypoxia. CA XIV is a polypeptide consisting of an extracellular N-terminal catalytic domain, a membrane-spanning segment and a short intracellular C- terminal segment with several potential phosphorylation sites. A subset of CAs lack CA activity due to point mutations but retain esterase function. CA 14 is widely expressed in the central nervous system
