A Reliable Research Partner in Life Science and Medicine

# Recombinant Human Sedoheptulokinase/SHPK Protein (His Tag)

Catalog Number: PKSH033014

Note: Centrifuge before opening to ensure complete recovery of vial contents.

## **Description**

**Species** Human

Source HEK293 Cells-derived Human Sedoheptulokinase; SHPK protein Met 1-Ser478, with an

C-terminal His

Calculated MW 52.5 kDa Observed MW 53 kDa Accession AAH20543.1

Not validated for activity **Bio-activity** 

### **Properties**

> 95 % as determined by reducing SDS-PAGE. **Purity** 

Concentration Subject to label value.

Endotoxin < 1.0 EU per ug of the protein as determined by the LAL method.

Store at < -20°C, stable for 6 months. Please minimize freeze-thaw cycles. Storage

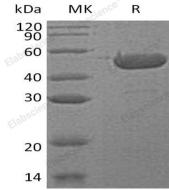

Shipping This product is provided as liquid. It is shipped at frozen temperature with blue ice/gel

packs. Upon receipt, store it immediately at < - 20°C.

Formulation Supplied as a 0.2 µm filtered solution of 20mM Tris-HCl, 500mM NaCl, 10% Glycerol,

3mM DTT, pH7.4.

#### Data

> 95 % as determined by reducing SDS-PAGE.

### Background

Sedoheptulokinase (SHPK) belongs to the FGGY kinase family, and is mainly located in cytoplasm. SHPK is strongly expressed in liver, kidney and pancreas. It is expressed at lower levels in placenta and heart, and very weakly expressed in lung and brain. SHPK catalyzes the chemical reaction: ATP + sedoheptulose = ADP + sedoheptulose 7-phosphatecan, It can transform sedoheptulose to sedoheptulose 7-phosphate in the condition of ATP, and acts as a modulator of macrophage activation through control of glucose metabolism. In addition, It also can be down-regulated by LPS.
