Purified Anti-Human TCRγ/δ Antibody[B1]

catalog number: E-AB-F11450P

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description	
Reactivity	Human
Immunogen	Recombinant Human TCRγ/δ protein
Host	Mouse
Isotype	Mouse IgGl, ĸ
Clone	B1
Purification	>98%, Protein A/G purified
Conjugation	Unconjugated
buffer	PBS, pH 7.2. Contains 0.05% proclin 300.
Applications	Recommended Dilution
FCM	$2 \ \mu g/mL(1 \times 10^5 - 5 \times 10^5 \text{ cells})$
Data	
Human peripheral blood μg Purified Anti-Human 0.2 μg Mouse IgG1, κ Alexa Fluor® 647-c	10^{3} TCR γ/δ Alexa Flux® 647H 1 lymphocytes were stained with 0.2 h TCRγ/δ Antibody[B1] (Right) and Isotype Control (Left), followed by onjugated Goat Anti-Mouse IgG ondary Antibody.
Human peripheral blood μg Purified Anti-Human 0.2 μg Mouse IgG1, κ Alexa Fluor® 647-c Seco	TCR γ/δ Aesa Fluor® 647H d lymphocytes were stained with 0.2 n TCRγ/δ Antibody[B1] (Right) and Isotype Control (Left), followed by onjugated Goat Anti-Mouse IgG ondary Antibody.
Human peripheral blood μg Purified Anti-Human 0.2 μg Mouse IgG1, κ Alexa Fluor® 647-c Seco Preparation & Storage	TCR γ/δ Antibody[B1] (Right) and Isotype Control (Left), followed by onjugated Goat Anti-Mouse IgG ondary Antibody.
Human peripheral blood μg Purified Anti-Human 0.2 μg Mouse IgG1, κ Alexa Fluor® 647-c Seco	TCR γ/δ Aesa Fluor® 647H d lymphocytes were stained with 0.2 n TCRγ/δ Antibody[B1] (Right) and Isotype Control (Left), followed by onjugated Goat Anti-Mouse IgG ondary Antibody.

Background

T cell receptor (TCR) is a heterodimer consisting of an α and a β chain (TCR α/β) or a γ and a δ chain (TCR γ/δ). TCR γ/δ is involved in the recognition of certain bacterial, self-CD1 molecule, and tumor antigens bound to MHC class I. The γ/δ TCR associates with CD3 and is expressed on a subset of T cells found in the thymus, the intestinal epithelium, and the peripheral lymphoid tissues and peritoneum. Most γ/δ T cells are CD4-/CD8-, some are CD8+. T cells expressing the γ/δ TCR have been shown to play a role in oral tolerance, innate immune response for some tumor cells, and autoimmune disease. It has been reported that γ/δ T cells also play a principal role in antigen presentation.
