Background

The protein encoded by this gene has sequence similarity witHuman, Mouseembers of the WD40 repeat-containing protein family.The WD40 group is a large family of proteins, which appear to have a regulatory function.It is believed that the WD40 repeats mediate protein-protein interactions and members of the family are involved in signal transduction, RNA processing, gene regulation, vesicular trafficking, cytoskeletal assembly and may play a role in the control of cytotypic differentiation.
