

A Reliable Research Partner in Life Science and Medicine

Recombinant Cleaved Caspase-7 (Asp198) Monoclonal Antibody

catalog number: AN301295L

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity Human; Mouse; Rat

Immunogen Recombinant Human Cleaved Caspase-7 (Asp198) protein

HostRabbitIsotype IgG,κ CloneB1058PurificationProtein A

Buffer PBS, 50% glycerol, 0.05% Proclin 300, 0.05% protein protectant.

Applications Recommended Dilution

WB 1:2000-1:10000

Data

Western Blot with Recombinant Cleaved Caspase-7 (Asp198) Monoclonal Antibody at dilution of 1:1000 dilution.

Lane A: Hela cell lysate.

Observed-MW:18 kDa

Calculated-MW:34 kDa

Preparation & Storage

Storage Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.

Shipping Ice bag

Background

This gene encodes a member of the cysteine-aspartic acid protease (caspase) family. Sequential activation of caspases plays a central role in the execution-phase of cell apoptosis. Caspases exist as inactive proenzymes which undergo proteolytic processing at conserved aspartic residues to produce two subunits, large and small, that dimerize to form the active enzyme. The precursor of the encoded protein is cleaved by caspase 3 and 10, is activated upon cell death stimuli and induces apoptosis. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene.
