

## Elab Fluor® Red 780 Mouse IgM, κ Isotype Control[MM-30]

**Catalog Number:** GFH09783S

**Note:** Centrifuge before opening to ensure complete recovery of vial contents.

| Description                    |                                                                                                                                                                                      |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Host</b>                    | Mouse                                                                                                                                                                                |
| <b>Isotype</b>                 | Mouse IgM, κ                                                                                                                                                                         |
| <b>Clone No.</b>               | MM-30                                                                                                                                                                                |
| <b>Conjugation</b>             | Elab Fluor® Red 780                                                                                                                                                                  |
| <b>Conjugation Information</b> | Elab Fluor® Red 780 is designed to be excited by the Red (627-640 nm) laser and detected using an optical filter centered near 770 nm (e.g., a 780/60 nm bandpass filter).           |
| <b>Storage Buffer</b>          | Phosphate buffered solution, pH 7.2, containing 0.09% sodium azide.                                                                                                                  |
| Applications                   | Recommended usage                                                                                                                                                                    |
| <b>FCM</b>                     | Each lot of this antibody is quality control tested by flow cytometric analysis as negative control. Use at concentrations comparable to those of the specific antibody of interest. |
| Preparation & Storage          |                                                                                                                                                                                      |
| <b>Storage</b>                 | Keep as concentrated solution.<br>This product can be stored at 2-8°C for 12 months. Please protected from prolonged exposure to light and do not freeze.                            |
| <b>Shipping</b>                | Ice bag                                                                                                                                                                              |
