## **Elabscience**®

## **ELP2** Polyclonal Antibody

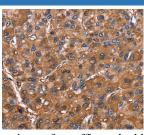

## catalog number: E-AB-14722

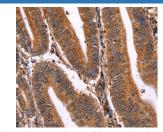

Note: Centrifuge before opening to ensure complete recovery of vial contents.

1:100-1:300

| Description  |  |
|--------------|--|
| Reactivity   | Human;Rat  |
| Immunogen    | Recombinant protein of human ELP2  |
| Host         | Rabbit   |
| Isotype      | IgG  |
| Purification | Affinity purification  |
| Buffer       | Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer and 50% glycerol. |
| Applications | Recommended Dilution   |

IHC Data

Immunohistochemistry of paraffin-embedded Human liver cancer tissue using ELP2 Polyclonal Antibody at dilution 1:40 Immunohistochemistry of paraffin-embedded Human colon cancer tissue using ELP2 Polyclonal Antibody at dilution 1:40

| Preparation & Storage |  |
|-----------------------|--|
| Storage               | Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.  |
| Shipping              | The product is shipped with ice pack, upon receipt, store it immediately at the temperature recommended. |

## Background

One member of the STAT family, Stat3, participates in a wide range of biological processes including nephrogenesis, gliogenesis, hepatogenesis, T cell proliferation, inflammation and oncogenesis.Many of these responses are triggered by the IL-6 family of cytokines, which transduce their vital signals through a common gp130 receptor chain .A novel Stat3-Interacting Protein, StIP1, contains 12 WD40 repeats, which mediate protein-protein interactions .StIP1 exhibits an affinity for members of the JNK family and may play a specific role in regulating Stat3 activation.Overexpression of StIP1 blocks Stat3 activation, nuclear translocation and Stat3-dependent induction of a reporter gene, suggesting that StIP1 regulates the ligand-dependent activation of Stat3, probably by serving as a scaffold protein that promotes the interaction between JNK and the Stat3 substrate.
