APC Anti-Mouse CD159a Antibody[16A11]

Catalog Number: AN00658E

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity Mouse Mouse Host

Isotype Mouse IgG2b, ĸ

Clone No. 16A11

APC Mouse IgG2b, κ Isotype Control[MPC-11] [Product E-AB-F09812E] Isotype Control

Conjugation

Conjugation Information APC is designed to be excited by the Red (627-640 nm) laser and detected using an

optical filter centered near 660 nm (e.g., a 660/20 nm bandpass filter).

Storage Buffer Phosphate buffered solution, pH 7.2, containing 0.09% stabilizer and 1% protein

protectant.

Applications

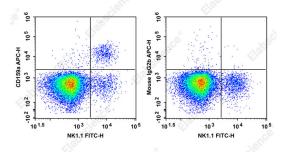

Recommended usage

FCM

Each lot of this antibody is quality control tested by flow cytometric analysis. The amount of the reagent is suggested to be used 5 µL of antibody per test (million cells in 100 μL staining volume or per 100 μL of whole blood). Please check your vial before the experiment. Since applications vary, the appropriate dilutions must be determined for

individual use.

Data

C57BL/6 murine splenocytes are stained with APC Anti-Mouse CD159a Antibody and FITC Anti-Mouse NK1.1 Antibody (Left). Splenocytes are stained with FITC Anti-Mouse NK1.1 Antibody and APC Mouse IgG2b, κ Isotype Control (Right).

Preparation & Storage

Storage Keep as concentrated solution.

This product can be stored at 2-8°C for 12 months. Please protected from prolonged

exposure to light and do not freeze.

Shipping Ice bag

Background

16641

CD159a, also known as NKG2A or KLRC1 (killer cell lectin-like receptor subfamily C, member 1), is a 43 kD type II transmembrane protein with extracellular C-type lectin domains. It belongs to the killer cell lectin-like receptor family also known as the NKG2 family. It is expressed on NK and NKT cells and activated CD8+ T cells. NKG2A binds to non-classical MHC class I molecule Qa-1 and causes inhibition of NK cell-mediated target-cell lysis.
