Elabscience Biotechnology Co., Ltd.

AF/LE Purified Anti-Human CD11c Antibody[3.9]

Catalog Number: GF14860

Note: Centrifuge before opening to ensure complete recovery of vial contents.

Description

Reactivity Human

Immunogen Recombinant Human CD11c protein

Host Mouse

Isotype Mouse IgG1, κ

Clone 3.9

Purification >98%, Protein A/G purified

Conjugation None (AF/LE)

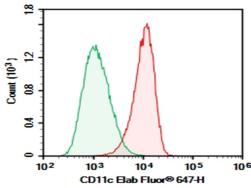

Buffer Sterile PBS, pH 7.2. < 1.0 EU per mg of the antibody as determined by the

LAL method.

Applications Recommended Dilution

FCM $2 \mu g/mL(0.5 \times 10^6 - 1 \times 10^6 \text{ cells})$

Data

Human peripheral blood granulocytes were stained with 0.2 μ g AF/LE Purified Anti-Human CD11c Antibody[3.9] (Right) and 0.2 μ g Mouse IgG1, κ Isotype Control (Left), followed by

Elab Fluor® 647-conjugated Goat Anti-Mouse IgG Secondary Antibody.

Preparation & Storage

Storage Store at 4°C valid for 12 months or -20°C valid for long term storage, avoid

freeze / thaw cycles. This preparation contains no preservatives, thus it

should be handled under as eptic conditions.

Shipping Ice bag

Background

This gene encodes the integrin alpha X chain protein. Integrins are heterodimeric integral membrane proteins composed of an alpha chain and a beta chain. This protein combines with the beta 2 chain (ITGB2) to form a leukocyte-specific integrin referred to as inactivated-C3b (iC3b) receptor 4 (CR4). The alpha X beta 2 complex seems to overlap the properties of the alpha M beta 2 integrin in the adherence of neutrophils and monocytes to stimulated endothelium cells, and in the phagocytosis of complement coated particles. Two transcript variants encoding different isoforms have been found for this gene.
